Continuation of Substance of Interview including description of the general nature of what was discussed: Examiner contacted Applicant's representative to propose amending the claim language of claim 2. The Examiner indicated that the claim, as presented in the amendment filed January 9, 2006, is not anticipated or obvious in view of the prior art, however the claim would be considered indefinite, because the step of "submerging the series of pipes in a cooling tank" is unclear since the previous step channels the exhaust "from the series of pipes through a radiator cooling system". The claim is indefinite because it is unclear as to whether the exhaust exits the series of pipes and then enters a cooling system that is separate from the series of pipes, or if the series of pipes are actually part of the cooling system. Upon further discussion and consideration, the Examiner and Applicant's representative agreed to the claim amendments set forth in the attached Examiner's Amendment, in order to pass the instant application to issue. .
